EuroVelo in Italy

Sevilla, 22 March 2011

Giulia Cortesi
On behalf of Claudio Pedroni (Italy EuroVelo Coordinator)

EV status in Italy

EuroVelo has not yet been included in any official national plan (nor has FIAB Bicalta network). FIAB is working at parliament level: bills from different parties concerning the national cycle network are pending. A few regional and some provincial authorities included stretches of EV cyclerooutes in their bike network plans (or in plan projects). E.g. Friuli Venezia Giulia, Liguria, Lombardy, Puglia, Veneto.

3 FIAB recent achievements

1. First survey on Italian rail-trails, February 2011
2. Guidebooks of CicloPo (EV 8 Mediterranean Route), forthcoming in April
3. A website instrument for EuroVelo (and Bicalta) routes mapping, online

I. First survey on Italian rail-trails, published by FIAB in February 2011

DALLE ROTAIE ALLE BICI

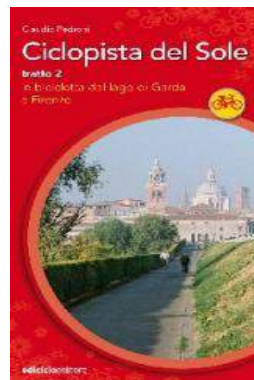

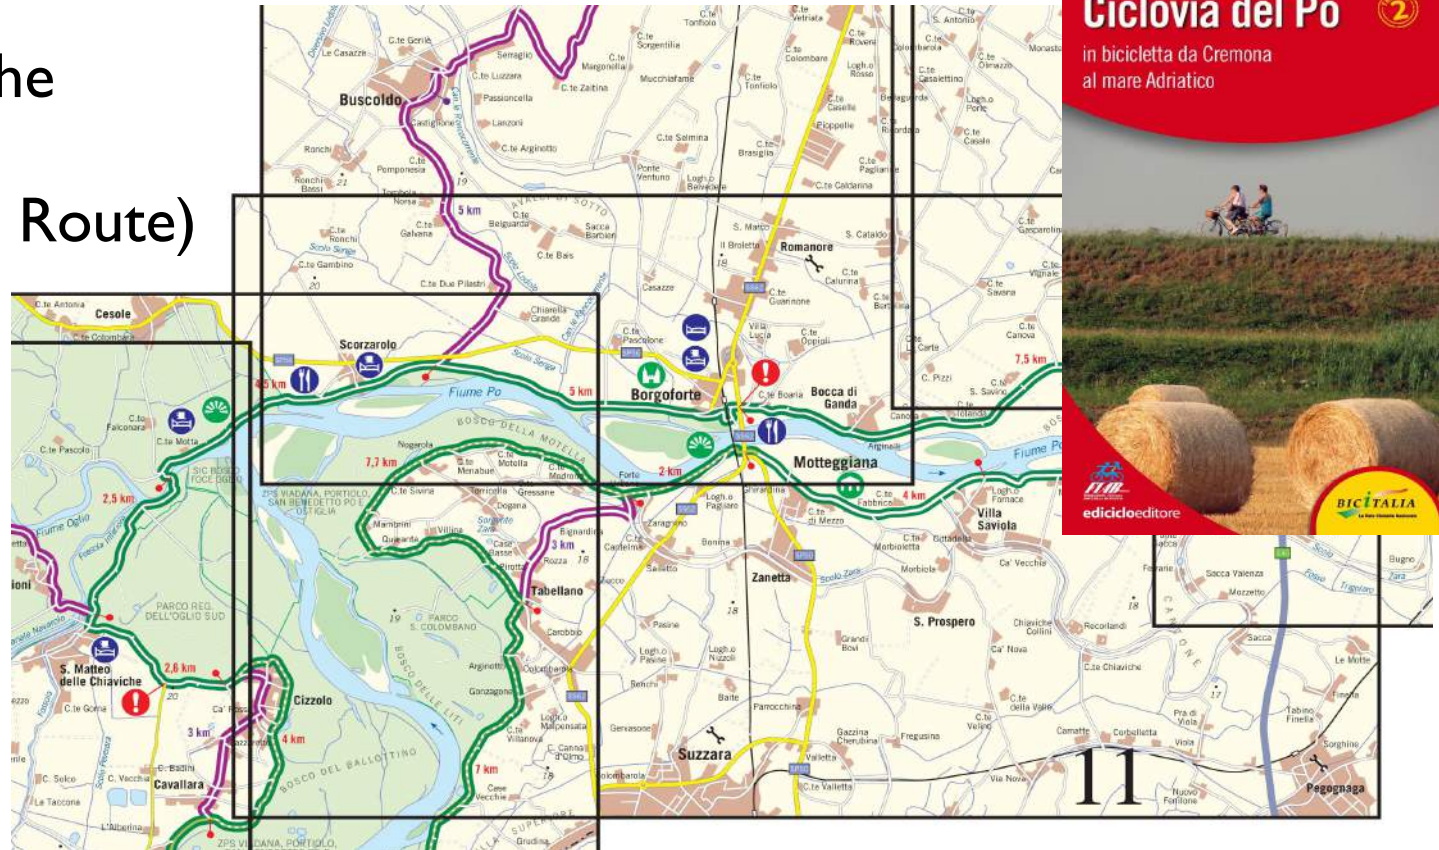

Indagine sulle ferrovie dismesse, recuperate all'uso ciclistico

a cura di Giulia Cortesi e Umberto Rovaldi

We found 775 km of cycleroutes realized thanks to rail-trails, 48% of which (370 km) are part of Bicitalia. We considered only rail-trails already open to touring bikes and longer than 5km. All Italian EV Routes (EV 5 Via Romea Francigena, EV 7 Sun Route and EV 8 Mediterranean Route) include a contribution from rail-trails in 7 cases for a total of 80 km.

2. New guidebooks

Two guidebooks of the river Po cycle route (EV 8 Mediterranean Route) by Claudio Pedroni, forthcoming in April 2011, Ediciclo (Portogruaro, VE)

2 guidebooks of EV 7 Sun Route from the Alps to Florence, both by Claudio Pedroni, have been published in 2006 and 2009

3. A website instrument for EuroVelo and Bicalitalia routes mapping

EV8

Sanfront - Staffarda 21.4 km

Da Sanfront ponte Po a Staffarda Confine TO
sede stradale
strada senza traffico (<50 veicoli motore/giorno)
superficie
pavimentata: asfalto o cemento
tipo traccia bici lungo corso d'acqua

EuroVelo and Bicalitalia routes surveyors can enter the tracks (i.e. GPS generated files) along with information gathered on the field (road type, surface, disused infrastructures, and of course POI or Albergabici – that is bikehotels). The website will show the development of the national cycle network.

Thank you for your attention.
